

Town of Somers New Garbage and Recycling Program

What does it mean for us?

- Improved garbage and recycling service with the use of carts for both the citizens and the Advance Disposal (the collector).
- Lower Cost to the Town of Somers through the use of automation.
- Potential for greater recycling quantities and thus higher revenues from the sale of recycled materials.
- Ability of residents to dispose of larger items through the use of the larger wheel-able trash carts.
- Environmentally friendly, cleaner streets and neighborhoods with the use of closed lid carts.
- Through the competitive bidding process and a 5 year contract the Town will see cost savings.
