

Smoke detectors save lives

Don't have time to check yours?

It only takes a second to test
your smoke detector.

Most fatal fires happen at night when people are asleep.
Smoke alarms give you time to escape.

Do you have enough?

Smoke detectors should be on every level of your home and in any room someone might sleep

Make sure your smoke alarms work

- **Test** at least once a month. Push the test button.
- **Clean** at least once a month. Dust with vacuum to unclog the vents.
- **Replace** the battery at least once a year (unless it is a ten year lithium battery).

Need a smoke detector? We can help!

- If you don't have a smoke detector in your home, we can install one free of charge. Smoke detectors are free for all Village/Town of Somers residents.
- If you have a smoke detector and have questions about installation, operation or maintenance, we can help!
- Give us a call. We will set up an appointment for our firefighters to come by and help you out.
