## **Fire Protection System Water Usage Reporting Form**

**Business Name:** \_\_\_\_\_

**Address:** \_\_\_\_\_  
\_\_\_\_\_

### **Description Of Water Usage Reporting Requirements:**

The Village of Somers Water Utility requires that all water used through a municipal water connection be tracked and reported to the water utility. Water usage is typically tracked through water meters installed on all domestic water service connections, however fire protection sprinkler systems and private fire hydrants are not metered or recorded, primarily because the meter itself would impede functionality of the system. It is the responsibility of the of the water utility customer to report all non-metered water usage to the water utility. The form below should be filled out by a fire protection system contractor for all testing and inspection water usage, as well as in the event of system activation, then turned in to a Somers Fire Department Fire Inspector during your bi-annual fire inspection. A few examples of non-metered water usage are listed below. A letter from The Village of Somers Water Utility is also attached for further reference.

- sprinkler testing and inspection.
- sprinkler activation
- testing and inspection of private fire hydrants
- flushing of private fire hydrants

Date of use:	Reason for water use (ex: testing or system activation):	Duration of water flow (in minutes):	Orifice size/diameter in inches:	Total estimate of gallons used:

**Completed water usage forms are to be submitted to a Somers Fire Department Fire Inspector during your bi-annual fire inspection. Additional forms can be found at [www.somers.org](http://www.somers.org) under the FIRE DEPARTMENT FORMS tab. If you have any additional questions, please contact the Somers Fire Department Fire prevention team at (262)-620-3285**
